This document describes the use of the keyboard that has been designed for typing Chadian languages with a Unicode font. It is based on the Keyman keyboard but is limited to Chadian orthography. For phonetic characters use the IPA keyboard.

To activate the Tchad Unicode Microsoft keyboard,

- click the Microsoft keyboard icon in the tool tray (bottom right of the screen) ,
- and
- then select the Turkish language  Turkish (Turkey) .

Make sure you have a Unicode font selected (e.g. Charis SIL, Doulos SIL, Andika, Gentium, Arial Unicode MS, etc.) to type special characters.
